Steinbeis Holding acquires shares in B+S Papenburg Energie GmbH and EBS Concept GmbH from Umweltdienste Bohn GmbH

Alsfeld. Umweltdienste Bohn GmbH has sold its shares in B+S Papenburg Energie GmbH and EBS Concept GmbH to Steinbeis Holding. The Alsfeld-based company has thus complied with the wishes of its long-standing joint venture partner. Both companies will continue their proven co-operation unchanged.

In future, B+S Papenburg Energie GmbH will trade as Steinbeis Energie Papenburg GmbH, while EBS Concept will retain its name. Both will be led by Jörg Warnke (Steinbeis) as sole managing director.

For the Steinbeis Group, the acquisition of the shares represents a strategic step that will significantly increase the proportion of sustainably generated energy. This should further strengthen the company's ecological orientation and make the energy supply of the entire Steinbeis Group even more sustainable.

About the B+T Group

The B+T Group takes care of the non-recyclable portion of waste and utilises its energy and material potential. With the help of modern sorting, processing and incineration plants, the B+T Group produces fuels of the highest and guaranteed quality and generates valuable energy. In this way, the Group actively reduces the global consumption of fossil fuels.

Founded in 1854, the family-owned company now operates its own plants at 14 locations in three countries (Germany, France, Switzerland) and co-operates with partners in eight other European countries. More than 350 employees work for the B+T Group family - more than 70 of them in France.
